# Welcome to Oryx International School

Welcome to Oryx International School, at Oryx we believe the first step in your child's education is the most important one. We pride ourselves on providing a unique, learning-enriched environment accompanied by high-quality and experienced teaching staff.

We believe that every child is unique and special and it is our job to provide them with the appropriate attention, care, support and encouragement required to bring

out his or her own talents and strengths. We lay down the foundation for children's success to move from one key stage to another to achieve both academically and personally throughout life.

Oryx International School is owned by Qatar Airways and managed by Orbital Education and is exclusively for the children of employees of Qatar Airways.

## Orbital Education

Orbital Education, which is based in the UK, owns and operates a growing group of international schools across the globe that cater for students between the ages of 3 and 18 years.

They specialise in delivering the English National Curriculum, enhanced to meet the needs of an internationally diverse student population.

## Our school values

Respect | Integrity | Excellence | Compassion | Responsibility

# What we do

## Our mission

Our mission at Oryx is to deliver an engaging, value rich, broad and balanced 'British International Education Programme' to the children of the employees of Qatar Airways by highly qualified and experienced UK teachers.

## Our vision

Our vision is to ensure that students leave Oryx International School enabled, confident and ready to face the challenges that their next stage of life will bring. They will have developed effective behaviours that will enable them to thrive and succeed as global citizens of the 21<sup>st</sup> century.

## Code of Conduct

All members of our school community are valued and should value others.

### Be respectful

- in speech and conduct
- by showing respect for others
- by being attentive
- by speaking when it is your turn to do so
- by respecting school equipment and that of your classmates
- by speaking in the language of the class

### Be prepared

- by wearing the school uniform correctly
- by being on time
- by being organised
- by having all the correct equipment
- by being ready to work

### Be hard-working

- by following instructions
- by starting work quickly
- by being focused on the learning activity
- by completing homework

### Be responsible

- by taking pride in your work
- by caring for your surroundings
- by moving around the school calmly
- by observing all safety practices
- by using all equipment carefully

### Certain forms of behaviour will not be tolerated under any circumstances:

- Bullying and malicious teasing
- Cyberbullying
- Physical or verbal abuse
- Persistent lying to a member of staff
- Stealing
- Vandalism
- Cheating in an exam
- Insolence towards any member of staff

### PLEASE NOTE

Mobile phones are not allowed to be used during the school day, whilst on site, on a school trip or at an official school event. Secondary students can only use their mobile phones with their teacher's permission. Collection at the end of the school day can be expedited by using mobile phones.

Chewing gum, all nuts and sunflower seeds and carbonated soft drinks are not allowed in school.

We have a very clear set of procedures for dealing with any breach of conduct at school and whilst we endeavour to support and reinforce positive behaviour, students will be accountable for their own actions and should expect consequences for any unacceptable behaviour as per our Rewards and Sanctions Policy.

### Reporting incidents

Students have a responsibility to report incidents of bullying, stealing and vandalism to a member of staff because these things are very damaging. Covering up for others will do much more harm than good. Please speak to your children about this.

## Registration and Form Time

Each Form Class will meet for 10 minutes at the beginning of each school day. This will allow Tutors to:

Register students attendance and punctuality, follow up referrals from teachers (positive and negative), check on the wellbeing of students, announce any forthcoming school events or activities, and send any occasional letters or forms to parents.

# Assemblies & trips, Parent portal, School policies

Assemblies form an important part of the pastoral programme.

## Assemblies

Assemblies form an important part of the pastoral programme in our Secondary School. Year Group assemblies and whole school Secondary assemblies will take place on a regular rotation during PSHE lessons.

Form Tutors and SLT will be responsible for providing a programme of assemblies.

## Field trips and outings

School trips are considered important to your child's learning, all visits are encouraged as they are associated with schoolwork and projects. Parents will be required to give permission for all outings and will be asked to cover the cost of arranged trips, including transport and entrance fees, we will try to keep costs to a minimum. All trips are risk assessed in advance and signed off by the Executive Principal.

Parents will be provided with a Transportation Agreement Policy via a link at the beginning of the academic year, which needs to be completed as per the email instructions.

A Trip Permission Form will be sent out for each trip, which needs to be completed and returned to the Class Teacher or Form Tutor.

## Parent Portal

Our Parent Portal will give you access to relevant school information, most importantly your child's School Report as well as the School Calendar and essential school documents and forms.

*To create an account, our technical team will send you an email with the link to the parent portal*

<https://parentsoryx.orbitaled.com/>

and your personal registration details which will include your registration number and password with a step-by-step process to follow.

Once you have set up your account please check under "COMMUNICATION --> MY CONTACT INFORMATION" to update your contact details, this will ensure that the school has your current information.

If you have any difficulties with setting up your account, you can contact IT on +974 4036 0088 for assistance.

## School Policies

## DID YOU KNOW?

An attendance level of 90% means your child is missing **1 day of learning every two weeks...**

## Homework

Homework forms an integral part of your child's education. We constantly review our procedures for homework in light of most effective practice and new arrangements for the curriculum in KS3. As an initial guide, we recommend the following advice to parents:

KS3: Students receive homework regularly each week from core subjects (English, Maths and Science). Other subjects may vary the regularity of homework and set longer time frames for projects and research topics etc. In general, each homework task should last no longer than 30 minutes. Where specific homework tasks have not been set, students are encouraged to revise notes, research, continue with further reading and preparation of the topics in class.

A Homework timetable will help students and parents to organise homework schedules. This is included in the Student Planner.

Homework should be seen as additional study at home to complement the work done in school time. It should not be excessive and students should not become stressed over this. Students are, however, expected to hand in homework on time and completed to the best of their ability. Students should record the due date for each piece of homework in their pupil planner.

Flipped learning: sometimes the teacher will ask students to prepare work at home to be discussed later in class. This allows for more time in class to help and support each pupil's learning and progress.

## Enrichment opportunities

Enrichment activities are currently not taking place in Qatar. When enrichment activities are back up and running we provide a range of optional activities and clubs to help our students develop various skills and pursue interests. We also provide a number of visits and trips which are complemented by a programme of visiting speakers from the community. We expect our students to take advantage of these opportunities and to contribute to the wider life of the school through in-school events, charity events and other organised activities. All students must sign up for at least one After School Activity per week. Some optional activities require an additional payment as they are provided by outside agencies.

## Student leaders

We believe in giving students the opportunity to take responsibility for certain aspects of school life and to experience leadership. Each form class elects two representatives for the Student Council which meets regularly to discuss student issues and to contribute to the wider life of the school community. These posts will rotate each term.

In addition, various monitor posts and buddy positions will be available for students in their areas of particular interest (eg library etc).

## Concerns

If you have any concerns regarding the welfare of your child, you should contact your child's **Head of Year** in the first instance in order to raise the matter. Thereafter, the **Assistant Principal - Head of Secondary** will be able to meet with you to discuss any specific ongoing concerns.

The school operates an Anti-Bullying Policy (including Cyber-Bullying) and we encourage students, parents and staff to discuss concerns openly towards a satisfactory conclusion. In all cases of wrong-doing we aim to change attitudes and behaviour to more acceptable levels and where necessary implement appropriate sanctions.

If you have a concern regarding a member of staff, or a particularly sensitive issue, please contact Mr. Laidlaw, Executive Principal, directly.

## Attendance

Attendance at school and at every timetabled lesson or activity is compulsory. If you wish your child to leave school during the school day or to miss any scheduled school day, please contact the school office in writing in advance. Requests to miss school will be treated on an individual basis and generally cannot be supported unless in extraneous circumstances.

We understand that sometimes children get ill and are unable to attend school, however, we expect a minimum of 95% - 97% attendance.

## Art & Design

### Half Term 1 & 2

Elements and principles of art and design. Concertina portfolio.

1. Using the art elements and principles, students will explore the interaction between people and the natural world. The impact (change) of the environment on human activity, the impact of scientific advancements on communities and environments.
2. The investigation is supported using a variety of artist models, including:
  - Unity & colour - Jaspas Johns
  - Rhythm & space - Vincent Willem van Gogh
  - Balance & shape - Wassily Kandinsky
  - Emphasis & line - Roy Lichtenstein
  - Contrast & texture - Max Ernst
  - Movement & value - Umberto Boccioni (Futurist)
  - Pattern & form - Bridget Riley (Optical art)

### Half Term 3 & 4

Zentangle design

1. Students will experiment and create their own Zentangle designs while exploring the nature and purpose of creative expression.
2. Students will explore the concepts of:
  - Unity using proximity
  - Similar elements with variations
  - Working with contrast
  - Emphasis
  - Balance

Key Skills:

- Uses process journal to develop ideas and concepts
- Displays care for work done to the best of their personal ability
- Encouraging contributions from others
- Varies quality of line
- Selecting and rejecting information according to goal
- Use feedback to inform their own artistic development and processes.

### Half Term 5 & 6

Linoleum relief printing

1. Inspired by the Biodiversity exhibition by Kurt Jackson.
2. Students will create their own leaf/biodiverse lino design, which illustrates effective use of line, shape, balance and positive and negative space.

Key Skills:

- Printing processes and how to use tools correctly
- How to hold gouge + safety rules
- How to use 'V' Gouge, its purpose and basic function

Preparedness for class:

- Necessary materials
- Equipment
- Sketchpad

## Design Technology

### Half Term 1 & 2

#### Core Graphic Skills

1. During this unit students will be learning to develop basic design communication skills including sketching, drawing controlled lines, 3D sketching and annotation.

#### Pop-Up Book (Mechanisms)

1. Students will then design and make a prototype pop-up book.
2. The book is aimed at children, and must contain a creative, eye-catching and interesting design to capture their imaginations.
3. It will contain a range of card mechanisms such as rotary, v-fold, internal stand, mouth and slide.
4. The project allows students to learn to develop their design communication skills and understand basic graphic principles.

### Half Term 3 & 4

#### Pewter Cast Keyring

1. In this project students will design and make a pewter cast piece of jewellery to a given theme.
2. In this unit students will research and develop a brief, develop a specification and from this generate ideas for designs.
3. Using CAD software students model and test their designs, and produce a mould before casting and finishing their designed product.

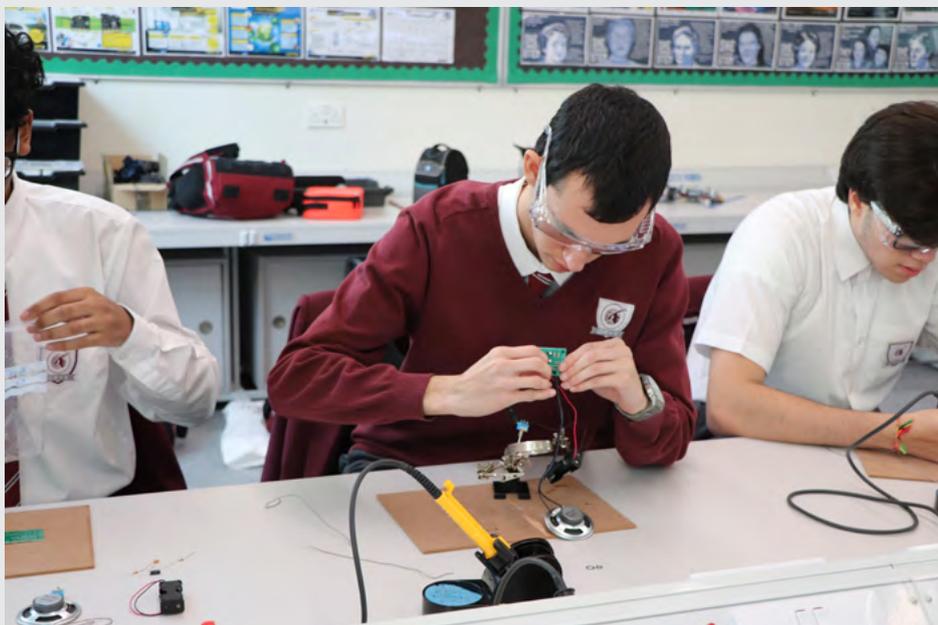

#### Mini Light Keyring

1. The LED key ring lights are designed as an introduction for students to design and make a product using basic electronics.
2. Students start by investigating the need for security and the problems of using locks in the dark.
3. They can then complete the design process of a mini-light, which can be attached to a key ring.

### Half Term 5 & 6

#### Block Bots

1. In this project students will create a small wooden character, with moveable arms and legs, that can be personalised.
2. Students will learn how to work safely in the workshop, how to select and identify tools and equipment by using the correct name and how to use basic hand tools and machinery to shape materials.
3. Students will be developing their knowledge and understanding of wood (soft, hard, manufactured board, processing, types, defects, sustainable forests and joining techniques).

## History

### Module 1

#### Ancient Civilisations

1. Students will investigate a range of ancient civilisations and will explore what is meant by the term 'civilisation'.
2. They will compare similarities and differences and will also be introduced to key skills, e.g. chronology, how historians use sources. This will extend into Term 2.

### Module 2

#### What impact did ancient civilisations have on the world?

1. Students will investigate a range of ancient civilisations and will explore what is meant by the term 'civilisation'.
2. They will compare similarities and differences and will also be introduced to key skills, e.g. chronology, how historians use sources.
3. Project on Ancient Civilisations.

### Module 3

#### Why is the Mughal Empire significant?

1. Students will investigate when the Mughal Empire existed, key events in its rise and why it ended.
2. This will support their chronological understanding and will also challenge their ability to explain cause and consequences.
3. Research Project - Comparing cities around the world.

### Module 4

#### Significance - how do we use criteria to make judgements on historical significance?

1. Students will consider what is meant by 'historical significance'.
2. They will develop criteria to make a judgement on significance and then will research and produce a project on a historically significant person or even of their choice.
3. Project - select a topic of their choice and explain why it is historically significant.

## STEM

### Half Term 1 & 2

#### Steady Hand Game (Electronics)

1. Students design a prototype electronic system that could be embedded in to a young child's activity toy that uses a number of inputs and outputs.
2. Th toy will need to match the age of the child and take into account the environment in which it is expected to function.
3. The focus is to adapt a design problem to a particular use and create a specification based on the design brief that results in an appealing, functional and innovative product.
4. Students must also present their ideas and refine their design ideas based on feedback.

### Half Term 3 & 4

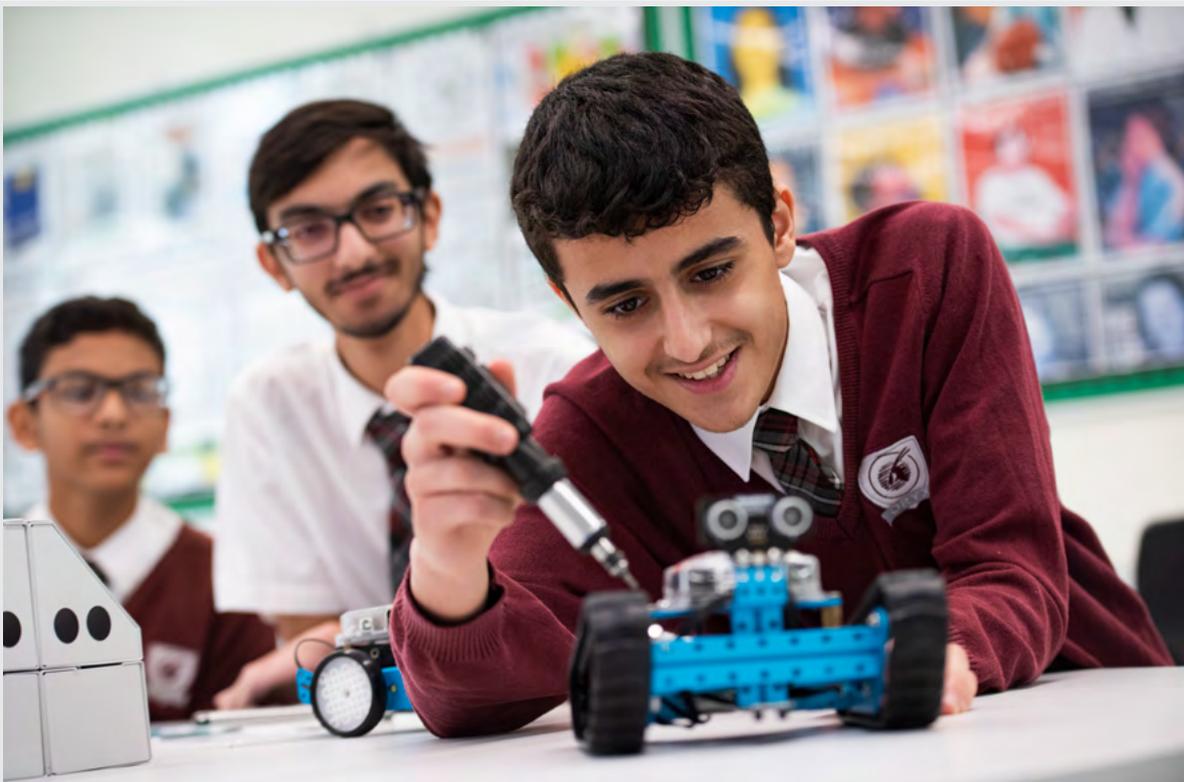

#### Structures and Mechanisms

1. Students will design and build a series of structural items including; bridges, mechanical hands and hydraulic systems.
2. Students will work individually and in teams by following an engineering design process.
3. These hands-on engineering projects mimic that of engineering techniques.
4. They will either use simple hydraulic systems made from plastic syringes and tubing or be made with simplified mechanical tiggers with hinges.
5. Once complete, students can test the ability of their hand, bridge or crane.

### Half Term 5 & 6

#### Self-propelling Vehicles

1. Automobile manufacturers across the world are working to design and build cars that are energy-efficient and emit less pollution into the air, while still allowing the driver to go long distances.
2. Students will be challenged to create a car out of recycled materials that can move on its own without a battery or motor.
3. From balloons, rubber bands, gravity or with a push students will engage in designing, developing and experimentation of their self-propelled vehicles.

## Art & Design

### Half Term 1 & 2

Topic : Creative Right Brain Drawing

Beginner foundation inspired by Betty Edwards:

Students will be introduced to the basic principles of right-brain drawing skills and the ability to recognise and draw negative spaces or space.

Key skills:

1. Displays care for work done to the best of personal ability.
2. The application and understanding of contour drawing or edges.
3. The ability to recognise and draw negative spaces or space.
4. Knowledge and skills to apply value or light and dark shading.
5. Consider personal performance and identify strengths and weaknesses.

### Half Term 3 & 4

Topic : Tessellation

Tessellation art is created through the process of covering a surface with a number of geometric shapes that fit together almost like a jig-saw puzzle, never overlapping and leaving no spaces between.

Also known as tiling, this process results in a mosaic pattern that can be used in a highly creative manner, despite its largely confining mathematical structure.

Key skills:

1. Analysis of Art relevant to the unit studied.
2. Communicate knowledge and understanding of the visual arts including specialised visual arts language, concepts and processes.
3. Varies quality of line.
4. Working tonally in light and shade.
5. Selecting and rejecting information according to goal.
6. Reflect on the success of methods, procedures and techniques.

### Half Term 5 & 6

Topic : Clay sea-life - Texture Vessels

The clay project starts with students looking at an artist's ceramic work (Heather Knight) and considering the differences between cutting into clay and adding to it.

Students then complete an artist research page about Heather Knight and this informs their clay vessel designs later on. From here students are introduced to the concept of underwater textures incised and applied to clay. They will use this concept to make at least one vessel.

Key skills:

1. Uses sketchbook to develop ideas and concepts.
2. Clay processes, joining, slip and score technique, incised and applied.
3. Making thinking visible, e.g. through drawing.
4. Reflect on the success of methods, procedures and techniques.
5. Collaborative skills: Assisting with the care and maintenance of tools and equipment helping clean up at the end of lessons.

# Year 8 Curriculum guide

## Design Technology

### Term 1 & 2

#### Clock Project (Design History)

1. The clock project combines different coloured pieces of acrylic to create an innovative product, which can be individually designed around a theme and manufactured by students.
2. In this project pupils will work out their ideas with some precision, taking into account how products will be used, who will use them, how much they cost and their appearance.
3. They will develop their understanding of designing and making and expand their practical skill.
4. They will use Computer Aided Design and Manufacture, as an integral part of designing and making process.

### Term 3 & 4

#### Board Game (Paper and Boards / Packaging)

1. Students will design and manufacture a prototype interactive board game.
2. The board has to be able to sense and respond to the player's pieces and then create random effects such as lighting and sound.
3. The board may also include an embedded dice using an appropriate display system.
4. Students will develop design strategies to develop ideas that meet a design brief, use CAD to develop a basic design and develop an appropriate programme.
5. They will need to be aware of costs and processes in manufacture, present their ideas and evaluate their proposed solution.

### Term 5 & 6

#### Puzzle Project

1. Students will be required to design and make a puzzle for children aged between 5 to 10 years old.
2. It is the student's decision on the type of game that they make (pin ball, maze, board game, etc) and the difficulty level.
3. The project allows pupils to understand basic principles of product analysis, design, development, material properties, processes, evaluation of a product and testing.

## Art & Design

### Term 1 & 2

Topic: Organic Form

Many cultures consider the balance and harmony found in nature to be the cornerstones of aesthetics.

Henry Matisse once said: "An artist must possess nature. He must identify himself with her rhythm, by efforts that will prepare the matery which will later enable him to express himself in his own language."

Students will examine the relationships between nature and art.

Key Skills:

1. Problem solving skills: Interpret visual imagery.
2. Identifying cause and effect: Causal relationship indentifying goals / targets.
3. Reflection skills: Reflect on the success of methods, procedures and techniques. Reflect critically on their own artistic development and processes at different stages of their work. Use feedback to inform their own artistic development and processes.
4. Study practices: Makes thinking visible, e.g. through drawing.

### Term 3 & 4

Topic : Urban Environments

How do artists use structures to make sense of the world we live in?

Inspired by different artists, students will produce a number of pieces based around urban environments using different types of medium.

Key Skills:

1. Organisational skills: Document artists research and art movements relevant to the unit studied.
2. Communication: Communicate knowledge and understanding of the visual arts including specialised visual arts language, concepts and processes.
3. Information literacy: Selecting and rejecting information according to goal.
4. Reflection: Use feedback to inform their own artistic development and processes. Using performance evaluation to adapt behaviour and learning strategies.

### Term 5 & 6

Topic: Lino Printing inspired by German Expressionism

German expressionism was an early twentieth century German art movement that emphasized the artist's inner feelings or ideas over replicating reality, and was characterised by simplified shapes, brigh colours and gestural marks or brushstrokes.

Among the many techniques and processes employed within Germ Expressionism - painting in oils, etching, lithography, drypoint - perhaps their most iconic remain their woodcuts. Students will replicate these techniques using lino printing.

Key Skills:

1. The application and understanding of printing techniques.
2. The ability to recognise and draw negative spaces or space.
3. Knowledge and skills to apply value or light and dark through carving into the lino.
4. Consider personal performance and identify strengths and weaknesses.

## Design Technology

### Term 1 & 2

#### Stationary Holder

1. In this project students will create a small wooden holder / case for stationary, jewellery, art equipment, etc.
2. Students will learn how to work safely in the workshop, how to select and identify tools and equipment by using the correct names and how to use basic hand tools and machinery to shape materials.
3. Students will be developing their knowledge and understanding of wood (soft, hard, manufactured board, processing, types, defects, sustainable forests and joining techniques)

### Term 3 & 4

#### User Centred Design - Design for Visually Impaired users

1. Students further their understanding of the engineering design process while combining mechanical engineering and bio-engineering to create assistive devices.
2. During this extended activity, students are given a fictional client statement and required to follow the steps of the engineering design process (EDP) to design a new wristwatch face for a visually impaired student at their school.

### Term 5 & 6

#### CAD / CAM Modelling

1. Developing skills in CAD/CAM to help communication and modelling.
2. Students explore modelling and advanced modelling using CAD/CAM and 3D printing before producing an electronic portfolio and using CAD software to produce a model of their choice.

## STEM

### Term 1 & 2

#### Product Design (Product in a Tine)

1. In this project, students will work confidently within a range of relevant domestic, local and industrial contexts, such as the home, health, leisure, culture, engineering, manufacturing, construction, food, energy, agriculture and fashion to help learn about products and inspire students own design work.
2. Students will consider a number of products and use the analysis to help them develop their own design specification for a new product.

### Term 3 & 4

#### Eco Design (Eco Schools Project and Crest Awards)

1. This unit introduces students to the concept of designing with the environment in mind, using examples from a range of familiar products, re-thought in keeping with the Six Rs principles.
2. It discusses a product's life cycle and the 'cradle to the grave' concept.
3. The aim is to inspire young people to think and behave like scientists and engineers, creating sustainably minded, environmentally conscious students.
4. Students will be introduced to the UN 17 Sustainability Goals, which address the global challenges we face, including those related to poverty, inequality, climate change, environmental degradation, peace and justice.

### Term 5 & 6

#### Boats / Hovercraft

1. Students will design and make a miniature propelled boat or hovercraft racer using a range of recycled materials.
2. Small motors and propellers will be used as a power source.
3. Students will compare boat and hovercraft designs from around the world and analyze them for strengths and weaknesses.
4. Theory work will be covered on propulsion, air cushions, buoyancy and water displacement.
5. Students will test their designs and compete with one another on the speed, steering and design of their vehicles.
